

*Testimonial of Mr. Patrick Potuin, Duct cleaning technician with 17 years of experience*

*I started my career in duct cleaning more than 17 years ago, before the existence of robots, so I had to enter into the ducts myself. I have worked with four different types of robots and I can confirm that ANATROLLER™ robots cannot be compared to any other product on the market.*

*I've used the ARI-100™ and the ARI-50™ and I can say without a doubt that the ARI-100™ is the most professional cleaning robot, and it has allowed me to save an enormous amount of time. It is a product of superior quality, and is definitely very enjoyable to use.*

*The ARI-50™ is made more for inspection, but can also clean. It is very useful and can connect and disconnect in a couple seconds. We can also record high resolution videos without a computer, thanks to an integrated video recorder which allows me to recuperate the videos on a USB key.*

*Since using ANATROLLER™ robots, I'll never go back to manual labour.*

*I recommend without hesitation to technicians to try it, so as to convince them that they have to adopt it.*
